DLLs, the program can use less memory because it does not need to load .The cryptocurrency industry has been bullish about USDT issuance by central banks. However, a top economist believe that the next US President will take over as the 7th Fed chairman, making it possible for the Fed to remove \$4.7 trillion in liquidity from the US economy. "The world's largest money printer and major bond buyer is off to the races as it prepares to flood the system with another \$150 billion in near-zero-percent-interest debt by the end of the year." This year will witness the issuance of more than \$1 trillion in US Treasuries by the Federal Reserve, according to the US Treasury Department's outlook, released in its annual report on the US debt policy. So far, the IMF has been the sole financial institution buying \$2 trillion in its newly launched bond market. The United States through the Treasury, has been also buying \$3.2 trillion in debt in 2018. However, the big news is that the Treasury's borrowing costs have lowered to such a degree that the new Fed chairman will be able to give the impression of a US Treasury surplus. At present, the US bonds that the Fed buys cost an average of 2.3 percent, a decline of over 50 basis points since December. By March, the bonds are 3e33713323
